

30 October 2006

Dear colleague,

We write to you with a rich experience of organizing eight surgical workshops. As per the delegates' feedback it has been an enriching experience for them & I can vouch that we as organizers also feel enriched. Without doubt, the success of any workshop is due to active participation of the delegates.

We have demonstration dissections by faculty for temporal bone and sinuses, followed by hands on dissection by delegates. The faculty along with invited guests will guide the delegates for hands on dissection. This will be followed by live surgical demonstrations by the faculty.

Our organizational task becomes daunting as we aim at continuous improvisation after achieving near excellence.

We will conduct hands on cadaveric sinus dissection for 30 delegates and temporal bone dissection for 20 delegates on first come first served basis.

For the comfort of the delegates we have a dedicated, air-conditioned & spacious conference hall equipped with an excellent two-way, four-channel audio-visual system.

My letter will be incomplete without expressing my sincere thanks to Sarchitnis Dr.Vasant Pawar, the Principal Dr.Mahajan & HOD, Anatomy Department Dr.Aboojiwala, NDMVPS Medical College.

Please feel free to communicate and let us know your views so that we can further improve the class and the content of the workshop.

Sincerely yours,

Dr.Shirish Ghan.

### KNOW THE FACULTY

**Dr.Dharanbir Sethi** is a senior ENT consultant at Singapore General Hospital. Since 1993 he is actively involved in endoscopic sinus surgery. He has more than 150 international meetings, conferences and workshops on endoscopic sinus surgery to his credit. He is a recipient of 1998 Mahaley Clinical Research Award (USA), 2001 Gold Medal for Excellent Publication (Singapore) and 2005 "Pioneer of ASEAN Rhinology" award by ASEAN ORL Federation. He has a special interest in endoscopic frontal recess and skull base surgery. He was a guest of honor at Professor Stammberger's FESS course in 2002. Reviewer for several journals, he is also on the editorial board of European Journal of Rhinology. He is currently working on a multimedia book on techniques in endoscopic sinus surgery.

**Dr.Shabbir Indorewala** is a senior ENT consultant at Indorewala ENT Hospital. He is a recipient of 1996 RAF Cooper Award and 1997 AOI-E.Merck Award. He is best known for his original research work on "Dimensional Stability of the Free Fascia Grafts", which included animal experiments. He has developed and popularized Endomeatal Tympanoplasty. He has also developed and popularized concept of Anterior Tympanotomy. He has also conceptualized and developed: (1) Remote controlled hydraulic operation table, (2) Auto regulated remote controlled generator switch, (3) Pedal controlled temperature regulated ear syringe & (4) Pedal controlled pressurized cannula / tube cleaning jet.
